

in association with Bluestone CBS, Chartered Building Surveyors, are able to deliver a comprehensive building pathology and defects analysis service.

With 50 years experience in the field, Bluestone CBS use their considerable knowledge of building construction and pathology to diagnose defects and prescribe remedial work. Bluestone CBS are able to utilise the high resolution images produced by HIGHER IMAGE to comment on those exterior elements of your building which are normally inaccessible without first committing to significant expenditure.

By identifying the problem and remedial work necessary to address the issue, the repair works can be planned in advance, health and safety issues can be fully considered and competitive quotations can be obtained.

This can be undertaken as an individual commission or part of your building's regular planned maintenance regime.

Bluestone CBS provide bespoke building surveying services to property owners, occupiers and managers throughout the UK with substantial experience covering retail, office, industrial and residential property. In addition to defects analysis services include: -

- comprehensive condition surveys
- programmed / planned maintenance & condition audits
- project management
- construction monitoring
- measured surveys
- feasibility studies
- dilapidations
- insurance reinstatement assessments & claims
- fire risk assessments
- access audits
- CDM Co-ordinator services

Bluestone CBS work with dynamic and quality driven individuals and organisations who expect value for money and a service that is professional and efficient. Clients of Bluestone CBS include: -

- The Home Office
- National Trust for Scotland
- Gala Coral Group Limited
- RNLI
- University of Glasgow
- JP Morgan
- Menzies Distribution Limited
- Lidl UK GmbH
- Rowland Pharmacies
- Thames Petroleum (Scotland) Limited
